🐙 <https://github.com/iamkibeh> 🐦 <https://twitter.com/IamKibeh>

Highly motivated, self-driven tech enthusiast with a strong background in software development. Committed to work in a professional setting that values professionalism in computing where my technical expertise strives to deliver products and services exceptional to client specifications. Seeking a challenging junior software engineering position that leverages my skills and experience to deliver innovative solutions.

📁 Professional Experience

Backend Engineer, *Uamuzi* [🔗](#) 05/2023 – present
Nairobi, Kenya

- Utilized Ruby on Rails for backend development, contributing to the company's software infrastructure.
- Collaborated with a team of engineers to design and implement scalable and efficient backend solutions.
- Developed and maintained RESTful APIs, ensuring seamless integration with front-end systems.
- Implemented data models and database structures, optimizing query performance and data storage.
- Conducted thorough testing and debugging to ensure the reliability and stability of the backend systems.
- Actively participated in team meetings, code reviews, and collaborative problem-solving sessions, fostering a productive and innovative work environment.

CTO, *Sasalink* 05/2023 – present
Nairobi, Kenya

- Led Sasalink as the CTO, driving the monetization of SaaS products for companies in the industry while actively contributing as a software engineer in the development of the application.
- Developed and executed the company's strategic vision, mission, and business objectives, driving revenue growth and market expansion.
- Collaborated with the product development team to design, develop, and deploy innovative and scalable software solutions.

- Implemented lean and agile development methodologies, enabling the team to iterate quickly and adapt to evolving market demands, resulting in accelerated product development cycles and faster time-to-market.
- Leveraged both front-end and back-end technologies like Node, Ruby on Rails, and databases such as PostgreSQL, and MongoDB to build robust and secure systems enhancing the overall performance and reliability of the application.

Qualifications and other Apprenticeship skills

- Experienced developing cutting-edge front-end web-based applications using HTML5, CSS3, TailwindCSS, ReactJS, NextJS, and JavaScript.
- Experienced in developing backend applications using NodeJS, Ruby, and Ruby on Rails, leveraging the power of this framework to build robust and scalable solutions.
- Proficient in version control tools like Git and Github, ensuring that code is maintained and tracked in a systematic and organized manner.
- Knowledgeable in working with agile methodologies like Jira, Kanban, and Scrum, enabling efficient project management and effective collaboration with team members.

Skills

Frontend (HTML5, CSS3, JavaScript, React, React-Redux, Next.js, TypeScript, TailwindCSS, MaterialUI)

Backend (Ruby, Ruby on Rails, MySQL, SQLite3, PostgreSQL, MongoDB)

Version Control & Project Management
(Git, Jira, Kanban)

Projects

Portfolio

Developed an impressive portfolio using cutting-edge technologies like ReactJS, HTML5, CSS3, and Material UI, showcasing my proficiency in building modern and responsive web applications.

Moringa Alumni [↗](#)

A full stack web, a fully responsive web application that allows developers to interact, connect as well as share their after-Moringa school success stories. My final project in Moringa school. Built using HTML, CSS Grid, Flexbox, NextJs, React-redux, Ruby, Ruby on Rails, and PostgreSQL.

Movie-Hub [↗](#)

Developed a movie application using HTML, CSS, JavaScript, React, and MaterialUI. Utilized the TMDB API to fetch data and display information about movies and TV shows. Implemented features such as search functionality, filtering, and sorting to enhance user experience. Used responsive design principles to ensure the application is optimized for desktop and mobile devices.

Education

Bsc. Computer Science,

Kenyatta University [↗](#)
